

Arkansas Department of Health

4815 West Markham Street • Little Rock, Arkansas 72205-3867 • Telephone (501) 661-2000
Governor Asa Hutchinson
Nathaniel Smith, MD, MPH, Secretary of Health

March 24, 2020

In light of on-going COVID-19 concerns and Governor Hutchinson's recent State of Emergency Declaration, the Arkansas Department of Health and the Arkansas Board of Examiners in Counseling and Marriage and Family Therapy recommends **voluntary suspension of all non-emergency or non-urgent in-person care or services to patients**. This recommendation is subject to change at the discretion of the Governor and Secretary of Health.

Recommended guidelines suggest delaying in-person treatment for high-risk patients who meet any of the following criteria:

- Recently returned from overseas travel;
- Clients, patients, and visitors who have a temperature of 100.4° F or greater, cough, or other symptoms of COVID-19;
- Aged 65 and older;
- Have compromised immune systems and/or present with chronic disease (ASA 2 and above)

Universal precautions are to be strictly followed in order to minimize the possibility of disease transmission. **We encourage providing services utilizing technology assisted means if possible, such as telehealth or videoconferencing** Here are several other suggestions:

- Magazines and children's toys be removed from your waiting room areas to help prevent the spread of the virus.
- Providing a single sign-in sheet per patient and/or sanitizing digital screens and/or stylus after each patient.
- Make sure your office is being sanitized more frequently and making sure that exam tables, rooms, etc., are being sanitized after each patient following the manufacture instructions.
- Instruct your patients and staff to practice social distancing in the waiting room and/or have some wait in their cars or work out some other alternative waiting room procedure.

Recommended strategies for employers to use now, for any infectious disease

- Actively encourage sick employees to stay home
- Separate sick employees
- Emphasize staying home when sick, respiratory etiquette and hand hygiene by all employees
- Perform routine environmental cleaning following the manufacture instructions.
- Advise employees before traveling to take certain steps

Collective actions taken by the community can help deter the proliferation of the COVID-19 virus in Arkansas. By rescheduling high-risk patients, professionals can do our part to prevent community spread, as well as help to preserve the limited supply of personal protective equipment that is critical for frontline healthcare personnel responding to this pandemic.
